EDUCATION

University of Washington

Sept 2019 – Jun 2023

B.S. Informatics: Software Development; B.A. Geography: GIS & Data Science

EXPERIENCE

Software Engineer Intern

Jan 2025 – Jun 2025

Apple

Seattle, WA

- Automated log analysis and data extraction for Apple Vision Pro by developing Python scripts and integrating internal AI APIs, reducing manual debugging workload.
- Built interactive dashboards using Python and JavaScript to visualize bug trends, performance regressions, and system logs, improving team insight during development cycles.
- Investigated root causes of software defects through structured analysis of device logs and user reports; collaborated cross functionally with engineering teams to ship fixes faster and improve system stability.

Freelance Software Developer

Jun 2023 – Jan 2025

Self-Employed

Seattle, WA

- Designed and developed commercial and personal websites using React, Next.js, and Node.js.
- Integrated TikTok API with Socket.IO to drive live user interaction, increasing user engagement and donation related conversions by 175%.

Full Stack Developer

Jan 2023 – Mar 2023

Adios COVID & UW iSchool

Seattle, WA

- Built COVID data dashboard using Next.js, D3.js, Mapbox GL JS, and AWS Lambda for scalable API access.
- Created map visualizations highlighting regional trends in infections, deaths, and vaccination using data pipelines for researchers.

Software Development Intern

Oct 2020 – Jun 2023

SDP Research Lab

Seattle, WA

- Developed GIS based interactive maps using JavaScript, Leaflet, and MongoDB for archival data visualization.
- Built web based photo gallery with custom SQL backend and PHP frontend for exploring historical imagery.
- Maintained and enhanced internal research tools by assisting with web development, debugging, and deployment tasks across lab projects.

Data Engineering Intern

Jun 2022 – Jul 2022

Semantic Web Company

Vienna, Austria

- Built knowledge graphs and taxonomies using Python, PoolParty, and semantic AI to improve enterprise search and data categorization.
- Scraped and parsed structured content with BeautifulSoup4 to inform iterative schema design and ontology development.

Web Developer

May 2020 – Jun 2022

UW CIRCLE

Seattle, WA

- Created and maintained informational university site using React and JavaScript to promote cross cultural engagement events.
- Integrated Instagram and Printful APIs to support e-commerce functionality for club merchandise ordering.

Frontend Developer

Jan 2020 – Jun 2021

SMASH

Seattle, WA

- Developed core components of a social networking platform using HTML, CSS/SCSS, JavaScript, and React.
- Implemented responsive layout for sign-up, login, and landing pages based on stakeholder design specifications.

SKILLS

Languages: Python, Java, JavaScript, C++, SQL, Swift, R, HTML/CSS, Bash, TypeScript

Frameworks/Technologies: React, Node.js, Next.js, Express.js, D3.js, Bootstrap, jQuery, Mapbox, REST APIs, GraphQL

Tools/Platforms: Git, Docker, AWS, Azure, Firebase, Postman, VS Code, IntelliJ, JIRA, Linux, Agile/Scrum

Libraries: Pandas, NumPy, Matplotlib, SciKit-Learn, TensorFlow, BeautifulSoup4

Databases: MongoDB, PostgreSQL, MySQL, SQLite
